Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 102(a) as being anticipated by Levin et al. "A stochastic model for human-interaction for learning dialogue strategies" IEEE January 2000.

As to claim 1, Levin teaches a dialogue state manager for facilitating the interaction between the user and a machine using a stochastic model to determine the state transition probability of the next dialogue using the user input and the current state of the dialogue (abstract; page 13, Par.1, page 14-15, page 9; Fig.1; Page 23, Fig.2)

As to claim 3, the Levin system is utilized for language dialogues system using speech recognition.

As to claim 8, Levin teaches rendering the output in accordance with the dialogue state and the user request.

Allowable Subject Matter

Claims 9-14 are allowed.

Claims 2 and 4-6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
